

WHAT IS MENTIMETER?

WHAT IS MENTIMETER?

TURN PASSIVE CLASSES INTO ACTIVE LEARNING EXPERIENCES

With interactive polls, word clouds, quizzes, and more, educators can spark curiosity, encourage participation, and gather real-time insights, from any device. You can track responses over time, uncover knowledge gaps, and adapt lessons based on student feedback and needs.

The result? A more inclusive, engaging, and impactful way to teach.

TURN ENGAGEMENT INTO UNDERSTANDING

Make Learning Active

Mentimeter makes learning a conversation, not a lecture. Because when students feel heard, they stay engaged. And that's when real learning happens.

- Gauge student opinions and tailor discussions in real time
- Turn passive listening into active collaboration

- Adapt to different learning styles and confidence levels
- Reinforce understanding through quizzes and polls

Create an Inclusive Classroom

Give every student a voice, not just the loudest ones. Mentimeter allows shy or hesitant students to contribute their thoughts confidently and anonymously.

- Break down participation barriers
- Encourage honest feedback and discussion
- Ensure learning materials are accessible, so every perspective is heard
- Allow students to reflect and respond without being put on the spot

Track Learning and Growth

Meet students where they are – and guide them where they need to go. Use real-time insights to assess comprehension, and track progress with post-session results.

- Use in-the-moment insights to identify where students struggle
- Measure which concepts students are retaining
- Adjust teaching methods based on real feedback
- Easily switch to non-anonymous voting for assessing students' knowledge when it matters

"When students talk about their classes, they highlight how interactive and enjoyable they are. And for the staff,

MENTIMETER IS A GAME CHANGER

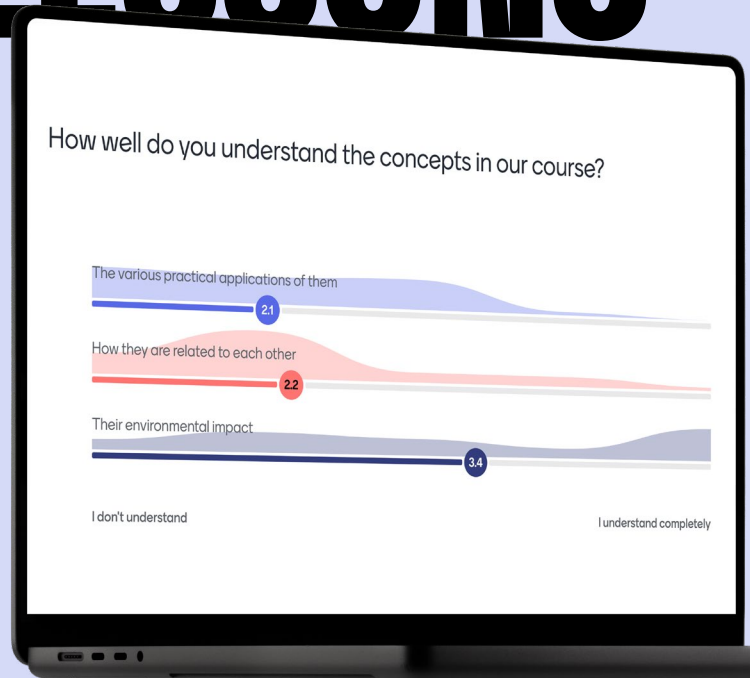

— it is easy to set up, so it's not just for early adopters or tech enthusiasts anymore; everyone is using it."

Dave Puplett

Associate Director of Libraries and Academic Enhancement at University of Greenwich

BRING LESSONS TO LIFE

Mentimeter activates every part of the learning experience, from warm-up activities and in-depth discussions to after-class reflections and feedback.

Keep learning on track

Quiz, question, reinforce

Energize students with fun, low-stakes assessments that make learning stick.

Spark debates and drive discussions

Use live polls to start meaningful conversations and champion critical thinking.

Challenge and clarify

Tackle misunderstandings and foster constructive discussions with Open Ended questions.

Put students in the lead

Check in before you start

Open with Multiple Choice questions to gauge students' grasp of the lesson's key concepts.

Keep the discussion going

Extend conversations and deepen learning with async, LMS-embedded surveys.

Get fresh feedback

Use Scales questions to ask how the class went and where they need more support.

Make speaking up simple

Turn hesitation into participation

Keep responses anonymous by default to make participation stress-free for shy and hesitant students.

Listen beyond words

Use reactions, polls, and Scales questions to hear from every student without the pressure to write.

Answer what's unasked

Hold anonymous Q&As that create a judgment-free space to surface the real questions.

Turn complexity into clarity

Make tough topics click

Break down and visualize challenging concepts with interactivity, videos, GIFs, images, and custom colors.

Spot knowledge gaps as they happen

Hold non-anonymous polls to identify students needing extra guidance — without showing names in class.

Track learning over time

Use trends and analytics to compare responses, measure progress, and reveal patterns.

"Mentimeter helps me know exactly where my students are struggling, so I can tailor classroom activities to their needs. **I maximize class time** by focusing on the areas that need the most attention."

Carla el Khoury

Arabic Instructor at University of Oslo
